THE RIDDLE OF THE BRIDGE

What is it?

And I can't do it...

Are we not going to get out of here?

It's very dangerous!

Even though we are improving with each key, I feel how much weaker I am getting without leaving here...

Of course, because our bodies are in the real world without food and sleep, and our brains are working like crazy, any nervous system can withstand...

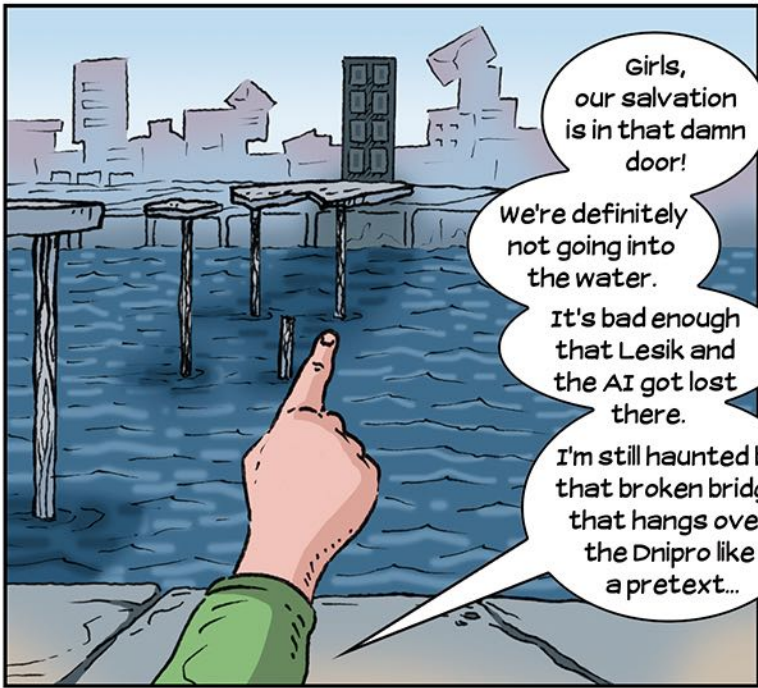

Ivanka, don't cry! We have Taras - he will definitely come up with something.

Taras, think, think, think!!!

The technology of virtual reality glasses needs to be improved.

Because these glitches are life-threatening.

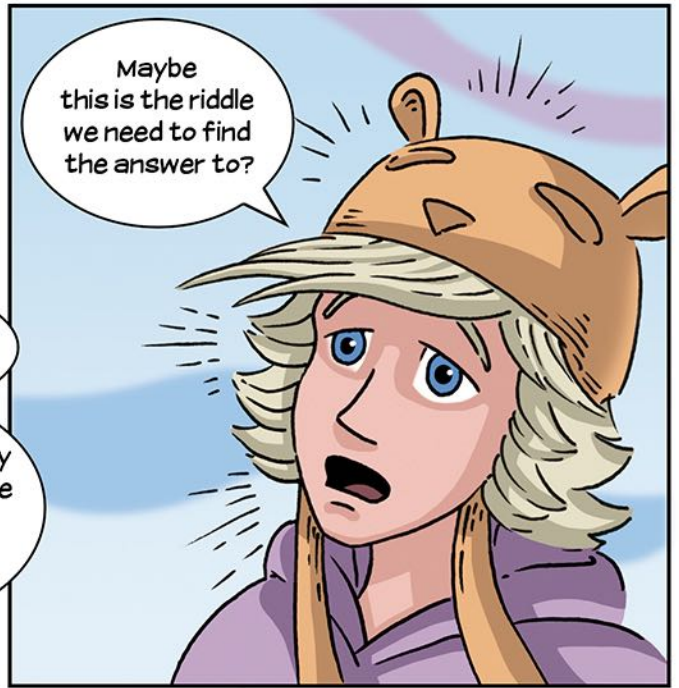

Girls,
our salvation
is in that damn
door!

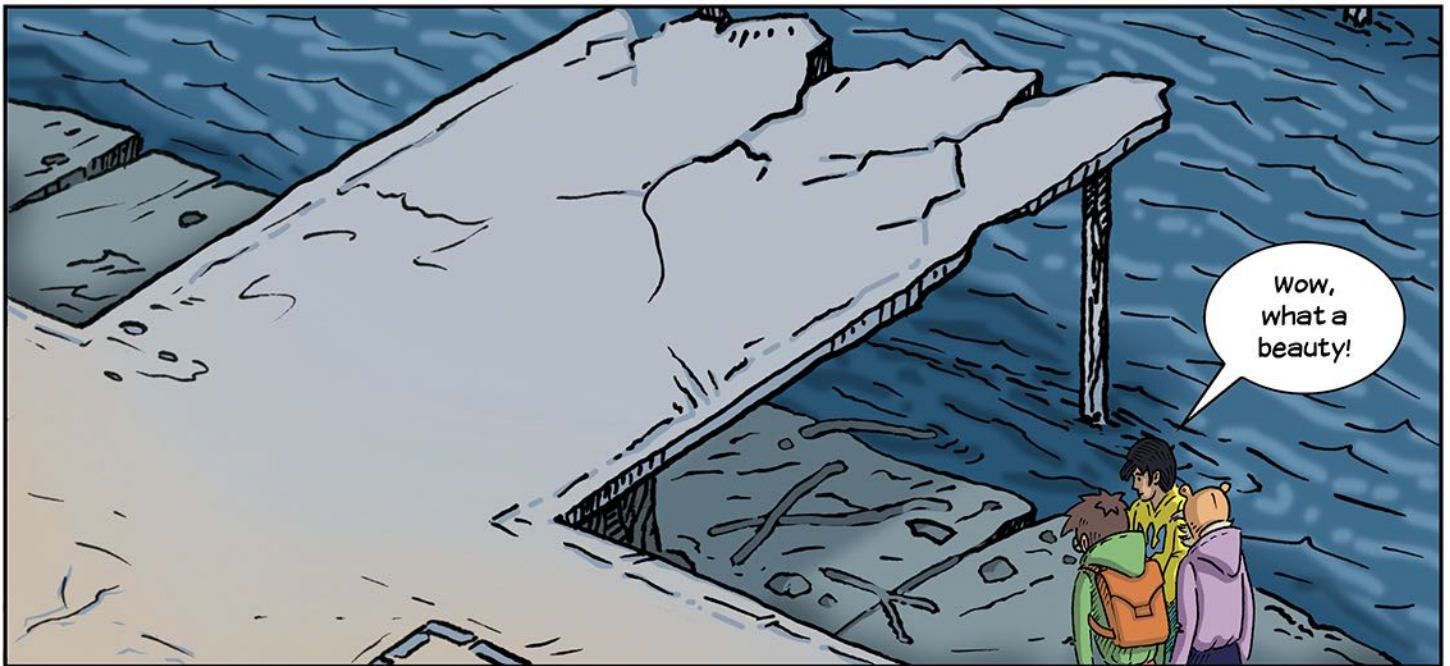

We're definitely
not going into
the water.

It's bad enough
that Lesik and
the AI got lost
there.

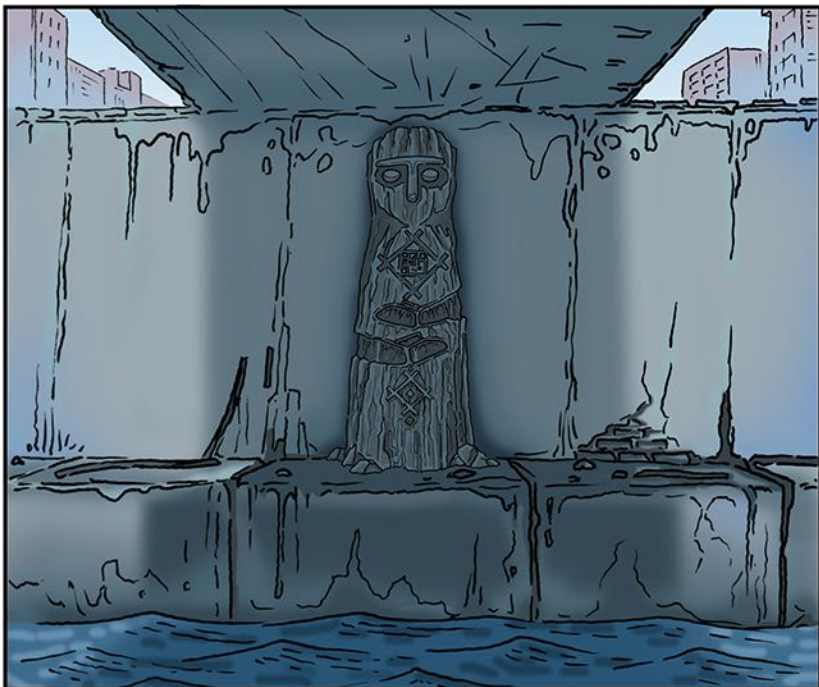

I'm still haunted by
that broken bridge
that hangs over
the Dnipro like
a pretext...

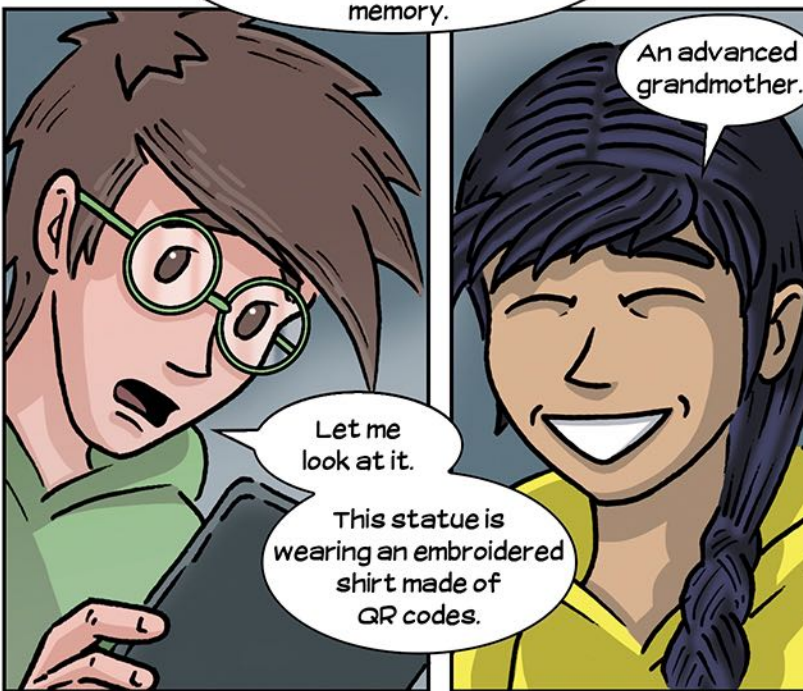

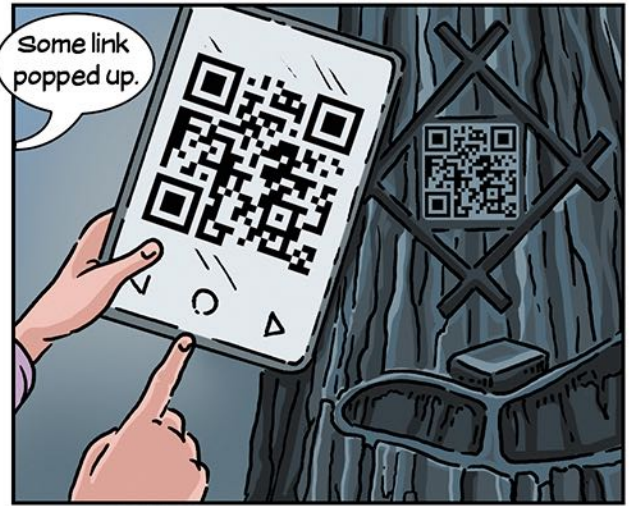

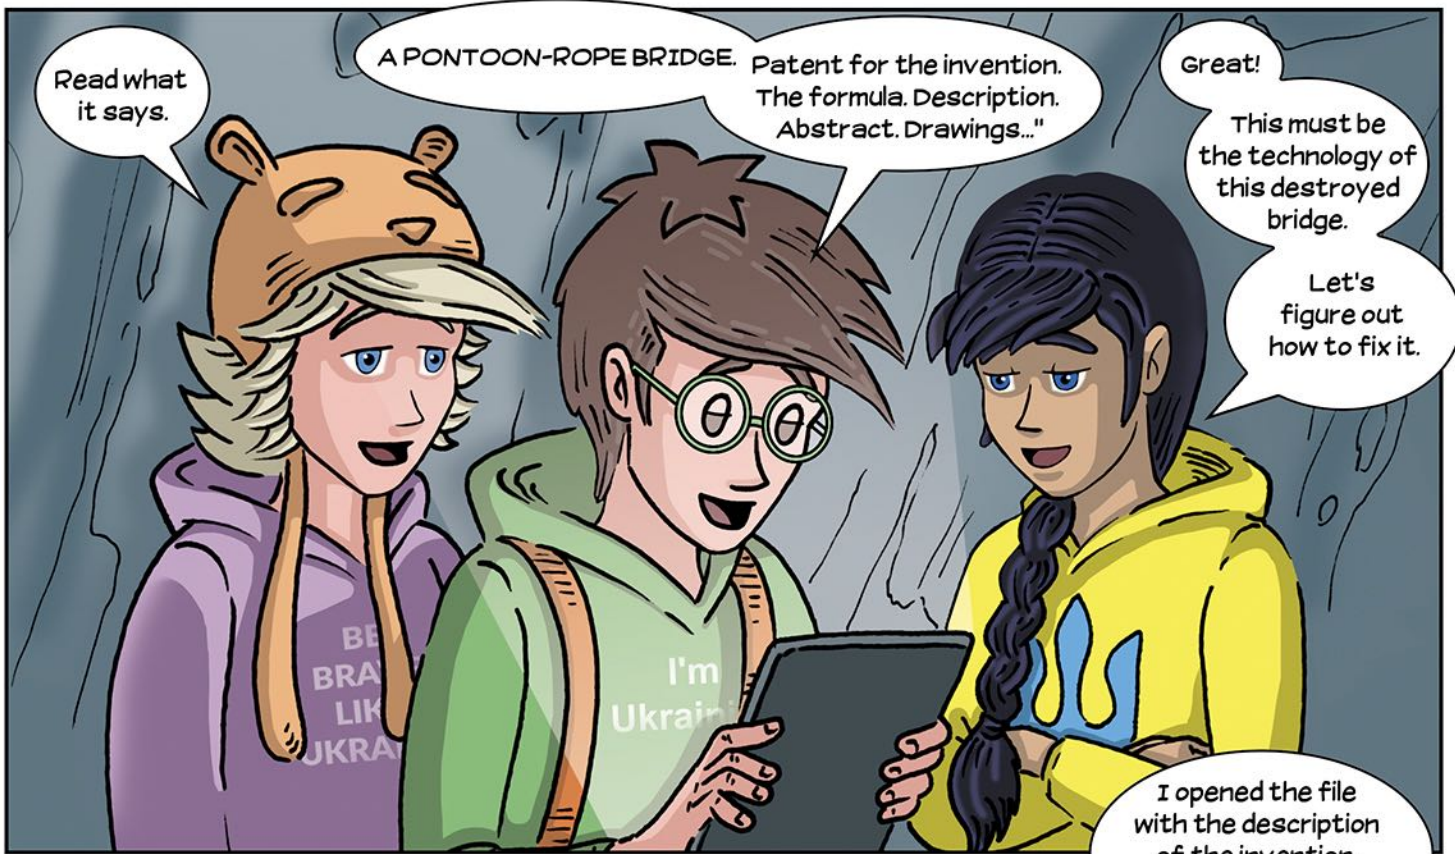

Maybe
this is the riddle
we need to find
the answer to?

Wow,
what a
beauty!

Read what it says.

A PONTOON-ROPE BRIDGE. Patent for the invention. The formula. Description. Abstract. Drawings..."

Great!

This must be the technology of this destroyed bridge.

Let's figure out how to fix it.

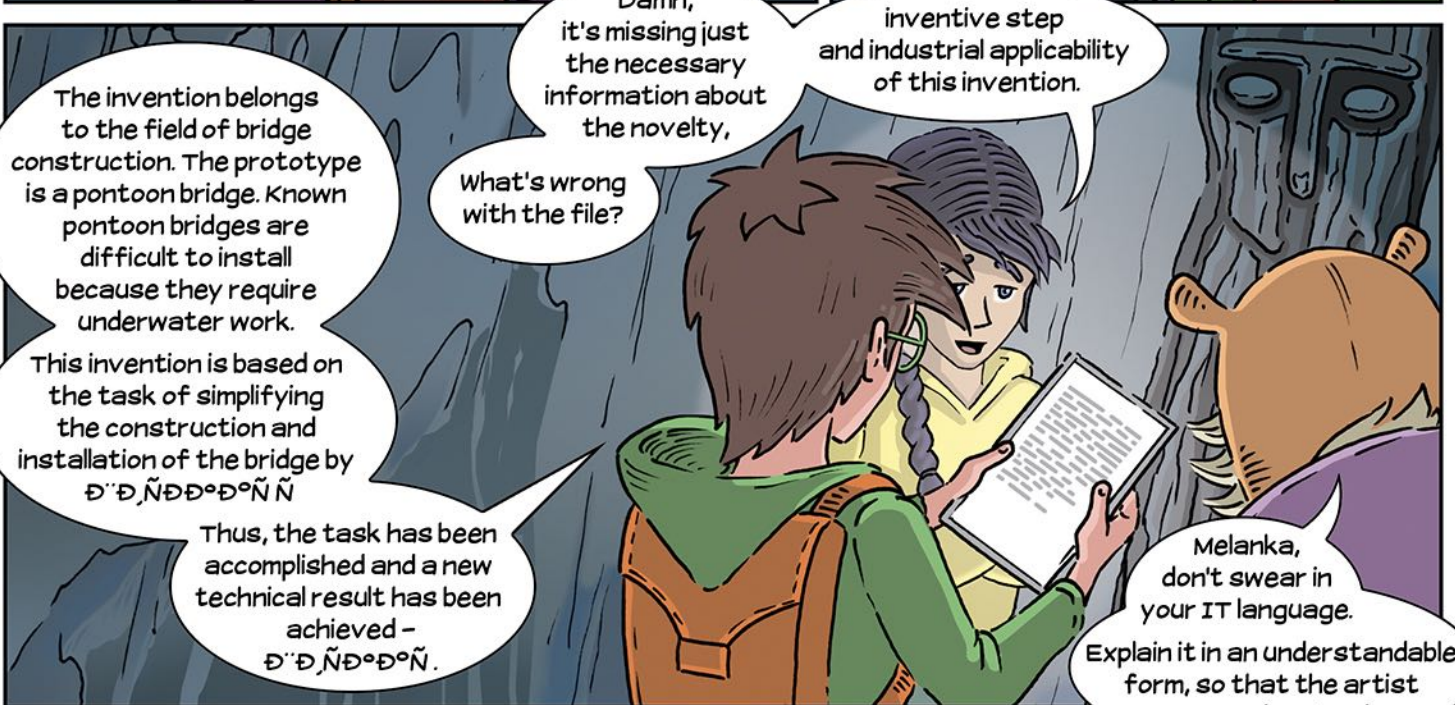

I opened the file with the description of the invention. There's something wrong with it...

Yay!!!

Girls, it's too early to rejoice.

The invention belongs to the field of bridge construction. The prototype is a pontoon bridge. Known pontoon bridges are difficult to install because they require underwater work.

This invention is based on the task of simplifying the construction and installation of the bridge by Đ°Đ°ÑĐĐ°Đ°ÑÑ

Thus, the task has been accomplished and a new technical result has been achieved - Đ°Đ°ÑĐĐ°Đ°Ñ.

Damn, it's missing just the necessary information about the novelty,

What's wrong with the file?

inventive step and industrial applicability of this invention.

Melanka, don't swear in your IT language. Explain it in an understandable form, so that the artist can understand.

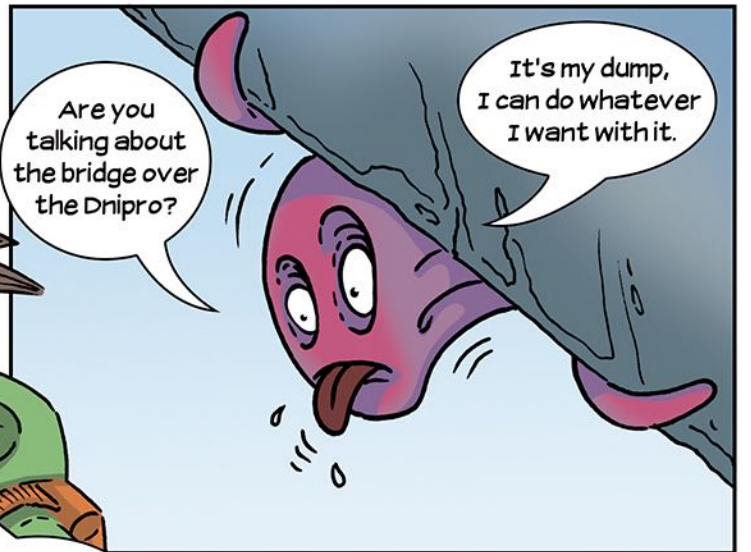

Do you have a new friend?

A stone-age artificial intelligence? Ha ha!!!

I see you're not going to calm down.

Are you talking about the bridge over the Dniro?

It's my dump, I can do whatever I want with it.

And this bridge is your invention?

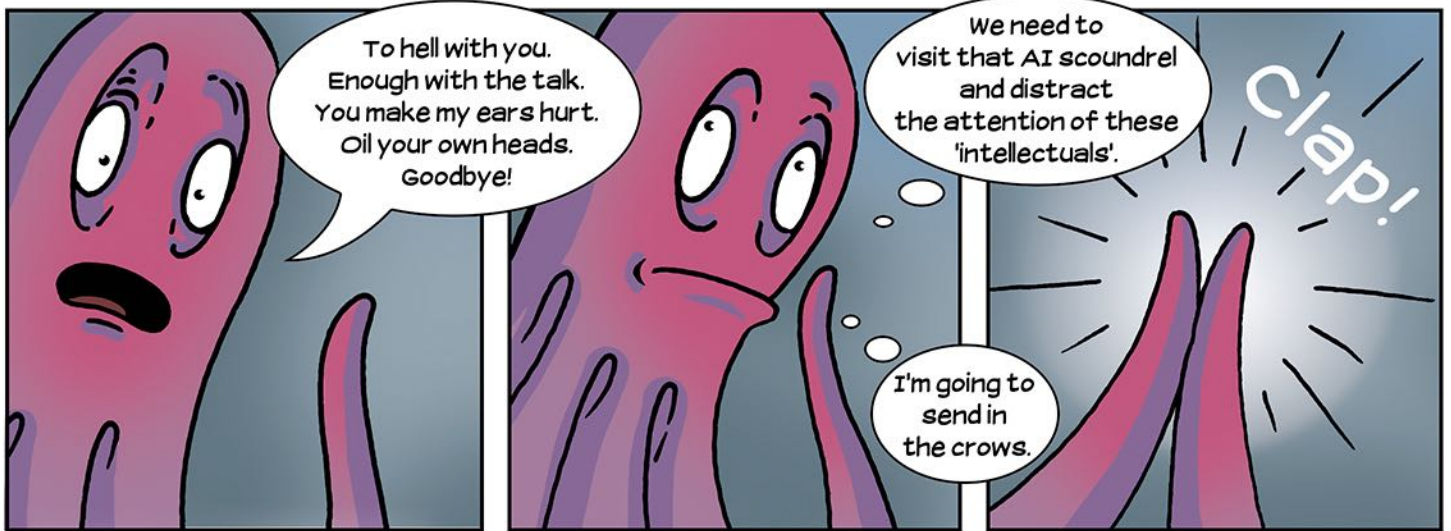

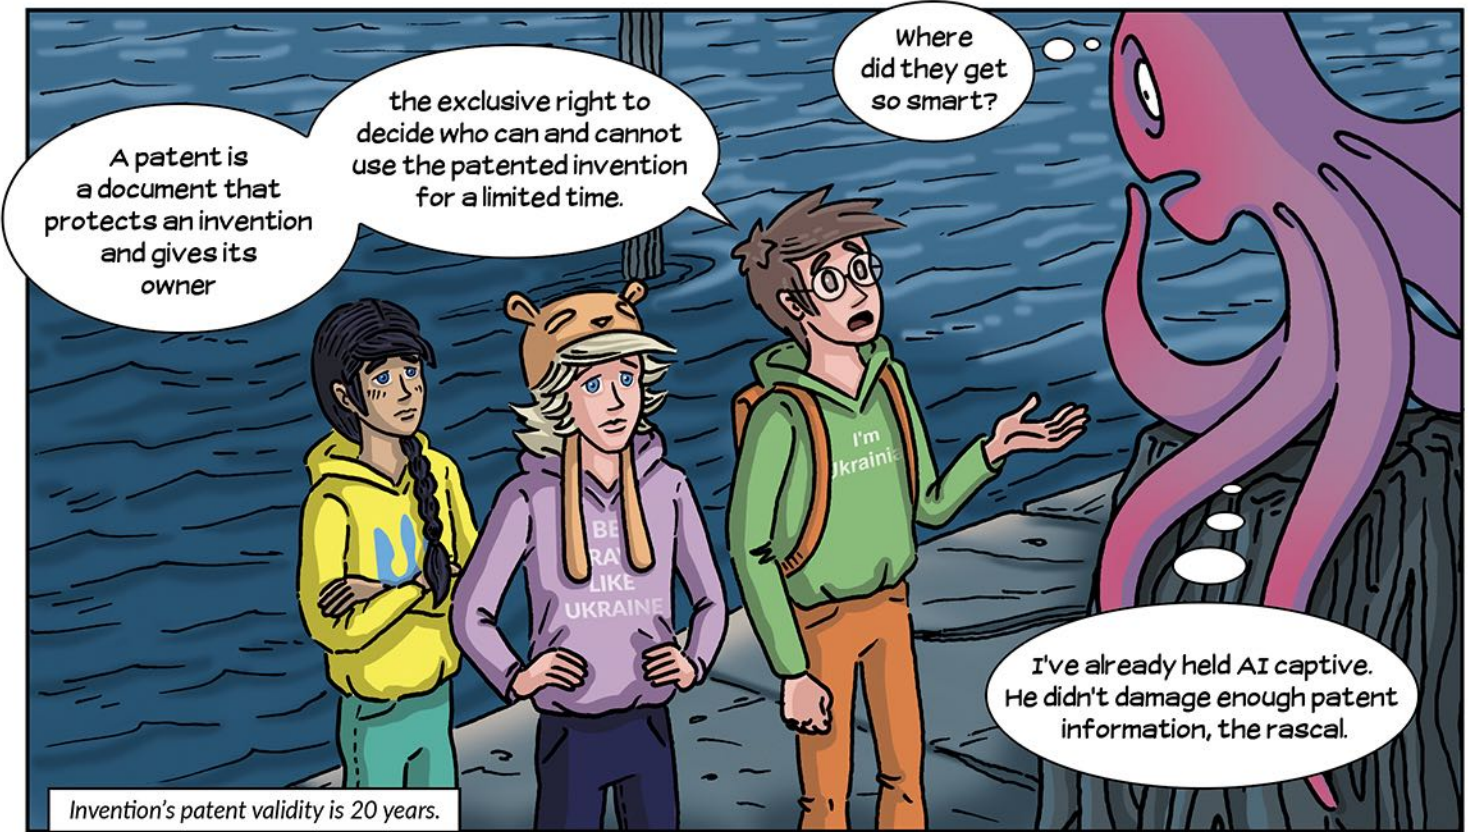

Yes, I'm very inventive Ignorance.

Say that you are also the owner of the patent for it. You'll be lying to others.

We can see that you are not the owner of the patent, because the information about it is open to everyone - this is the rule for all patents, so that everyone can read them.

What is this?

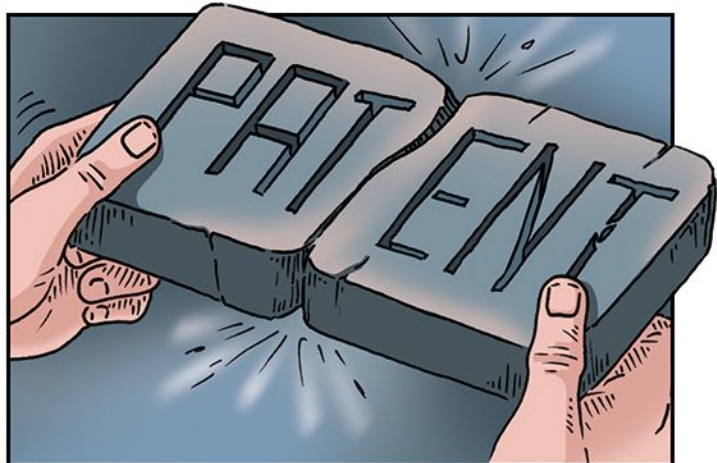

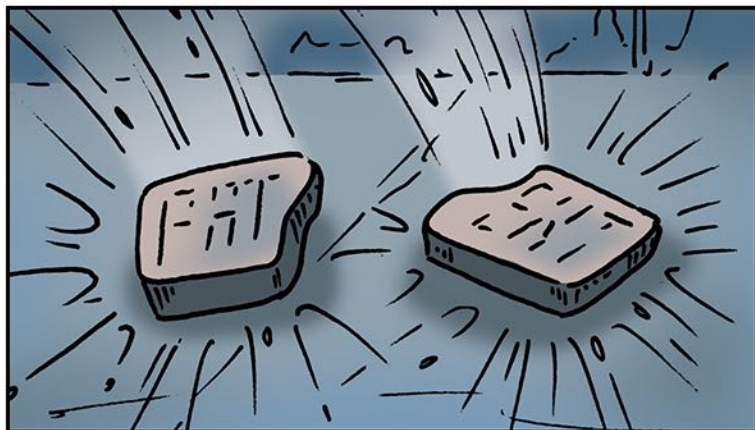

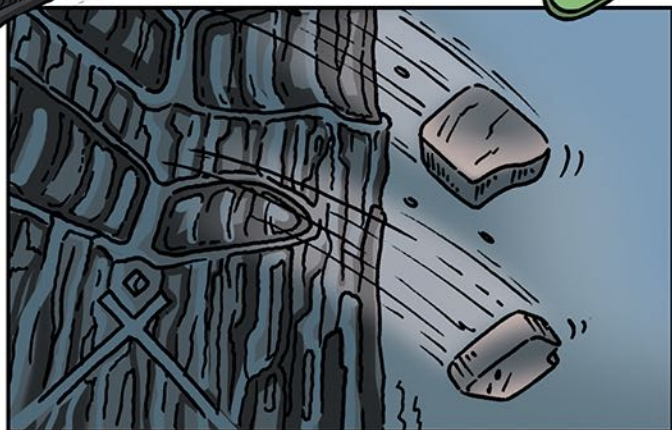

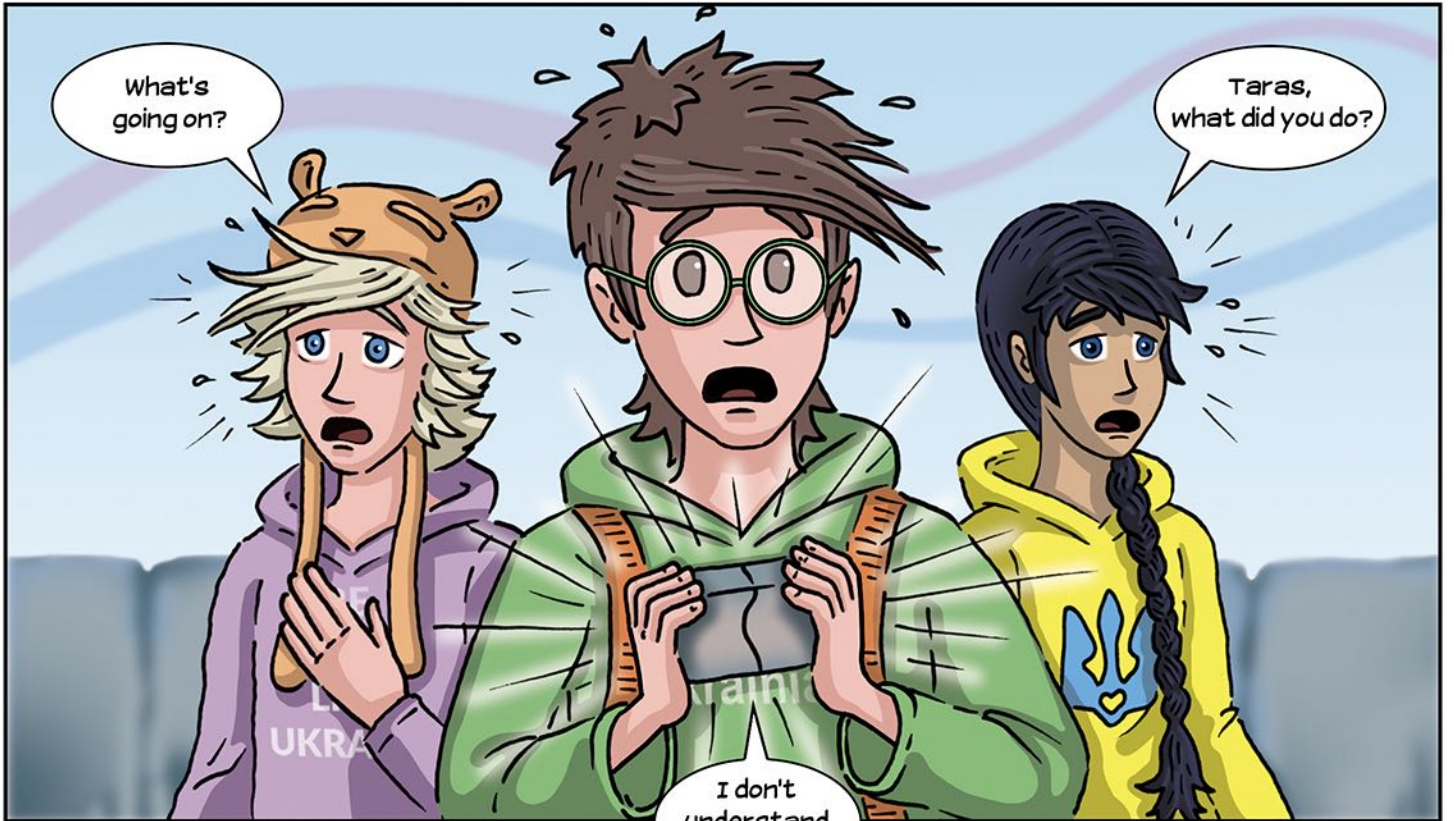

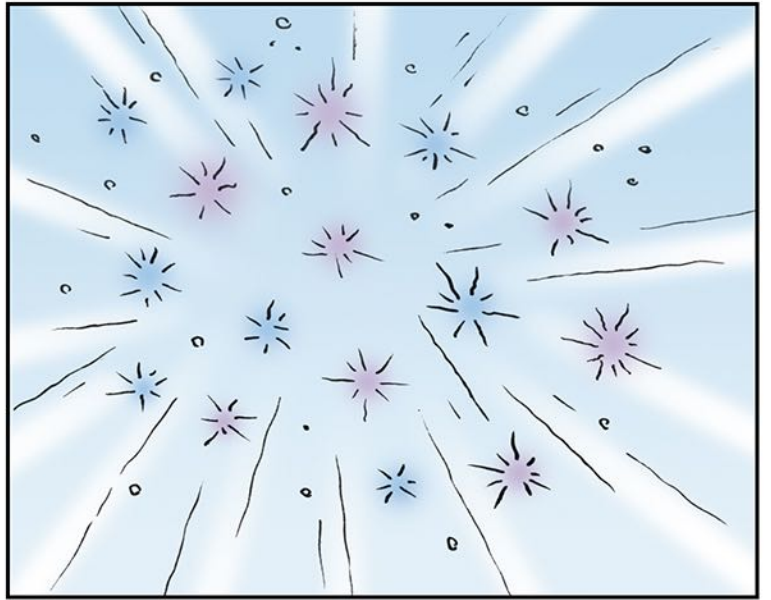

Get out!!!

LOOK OUT!!!!
RUN AWAY!!!

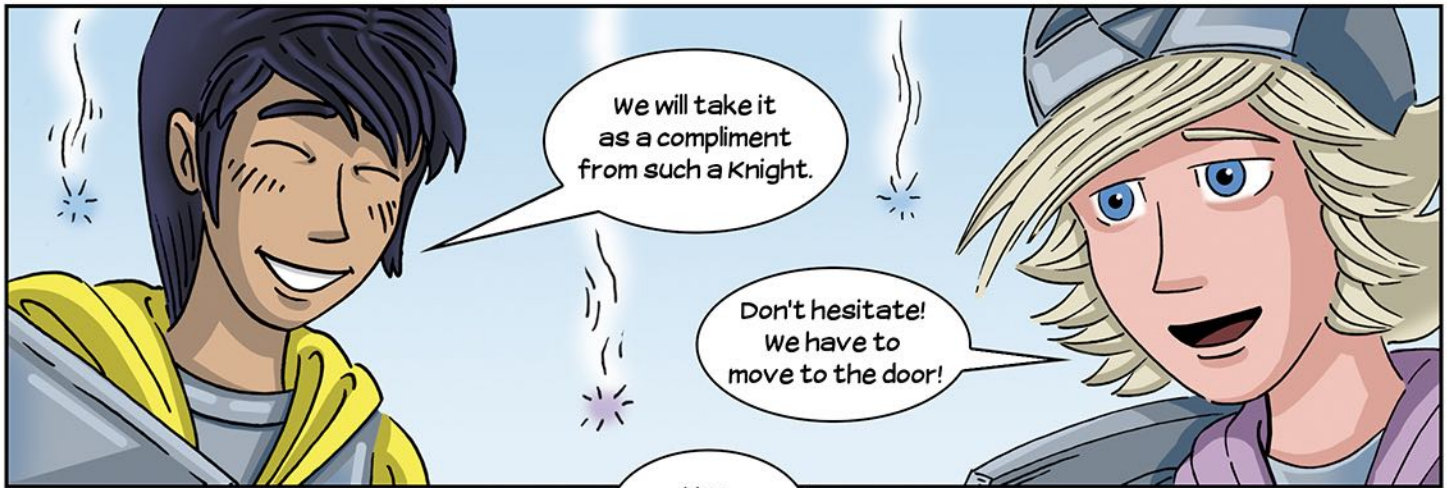

Guys,
maybe this tablet is
the third key?

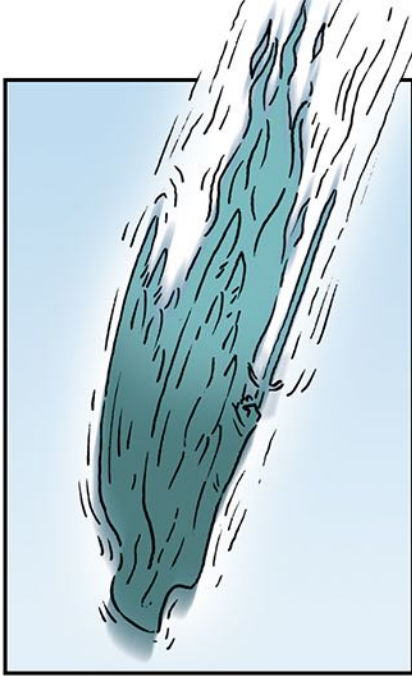

Do you think
he would be so
visible?

Why not?
If you want to hide
something well,
put it in the most
visible place!

Indeed, even
in Ukrainian mythology,
Scythian women
were amulets.

Therefore,
she protected the last
key by keeping it under
her heart.

Who is that dark angel?

It looks like Magura.

Is it bad or good? Explain...

Actually, Magura is a cloudy warrior maiden who personifies the power of Good and protects the Warriors!

She doesn't strike me as a force of good...

Only honest, well-mannered and valiant Warriors who know their worth and respect the rights of others can go this way!

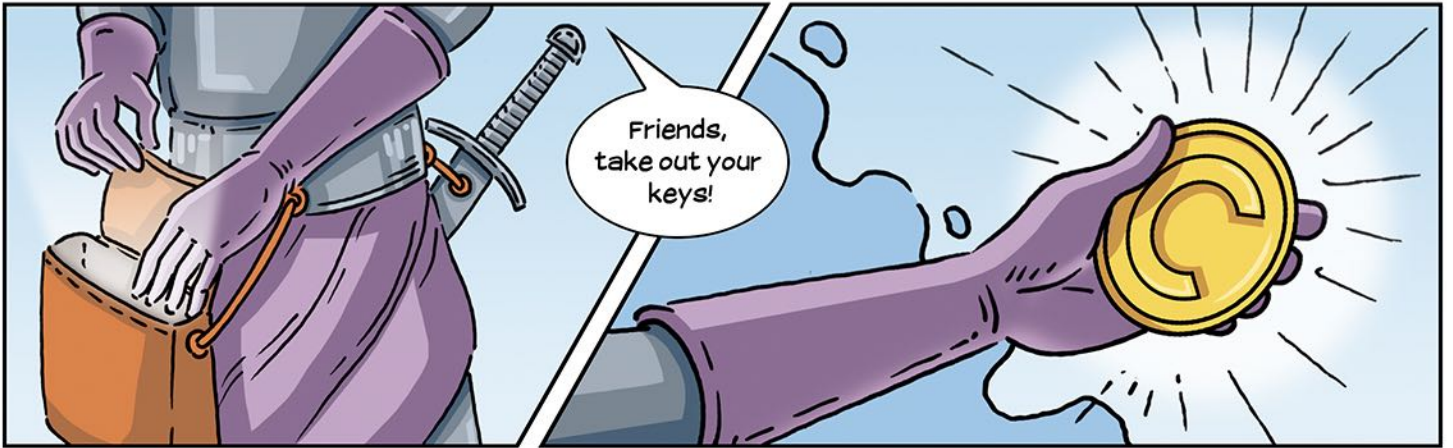

Magura, we congratulate you!

We have traveled a long way to get to this door.

And we consider ourselves worthy to enter it!

Prove it!

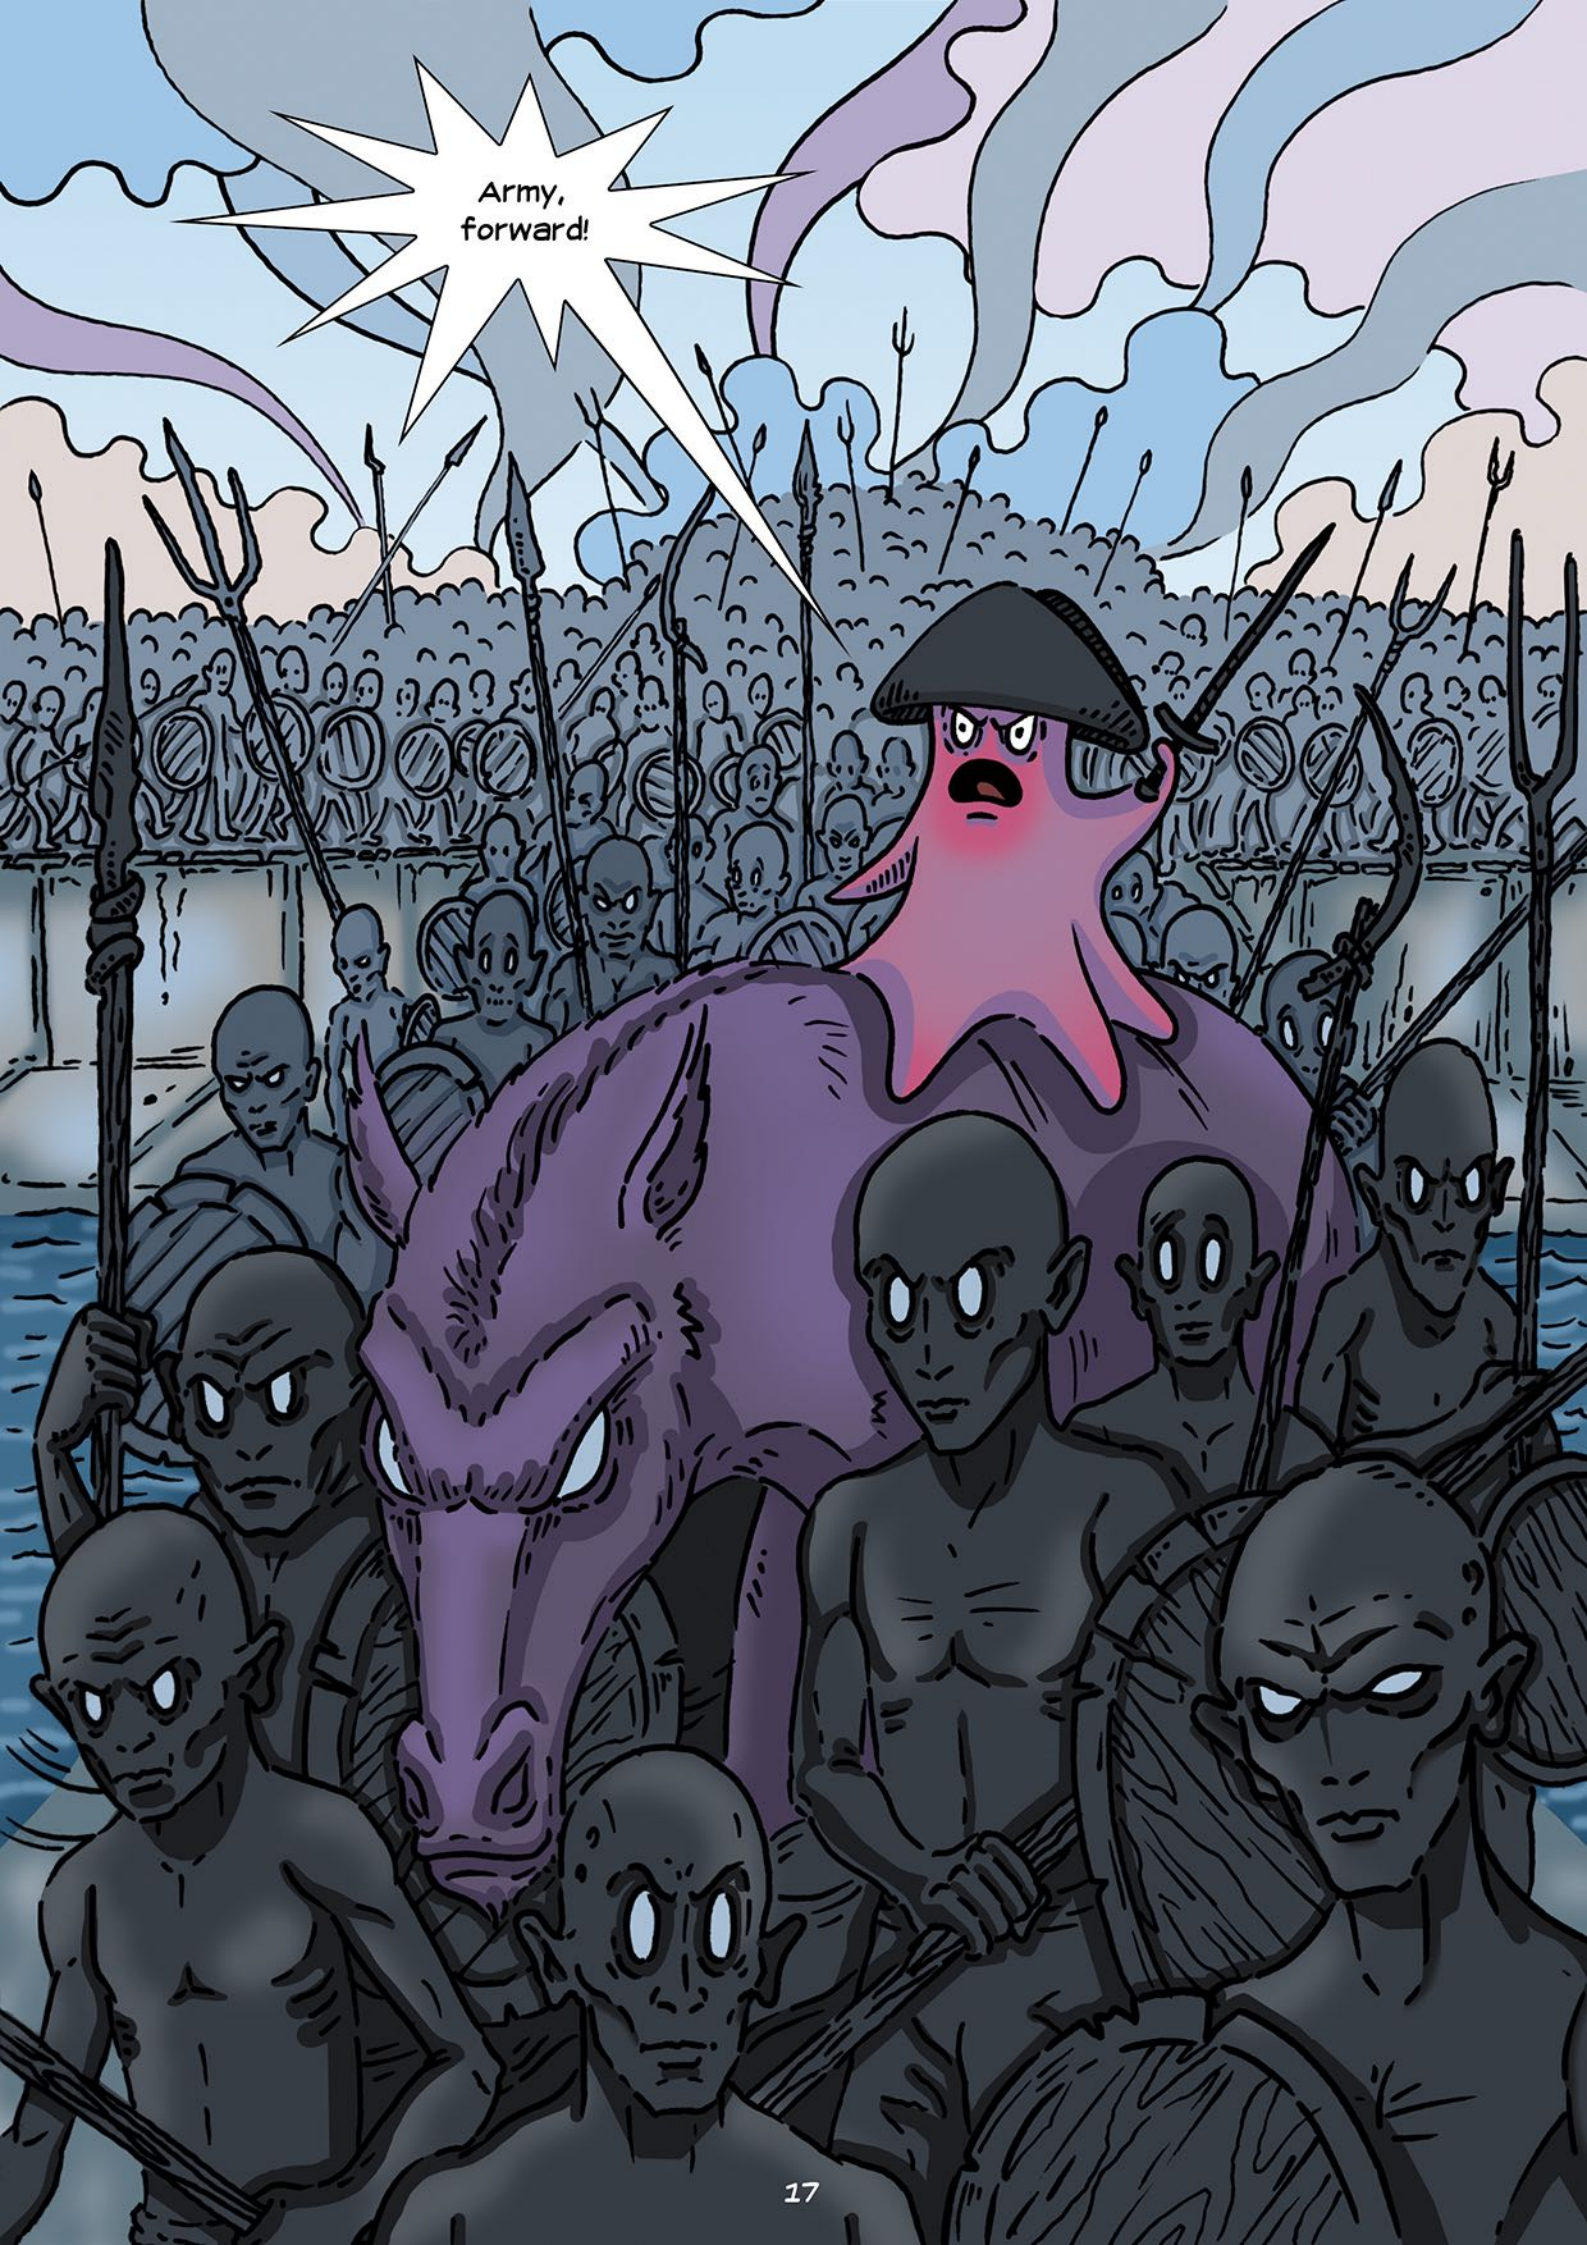

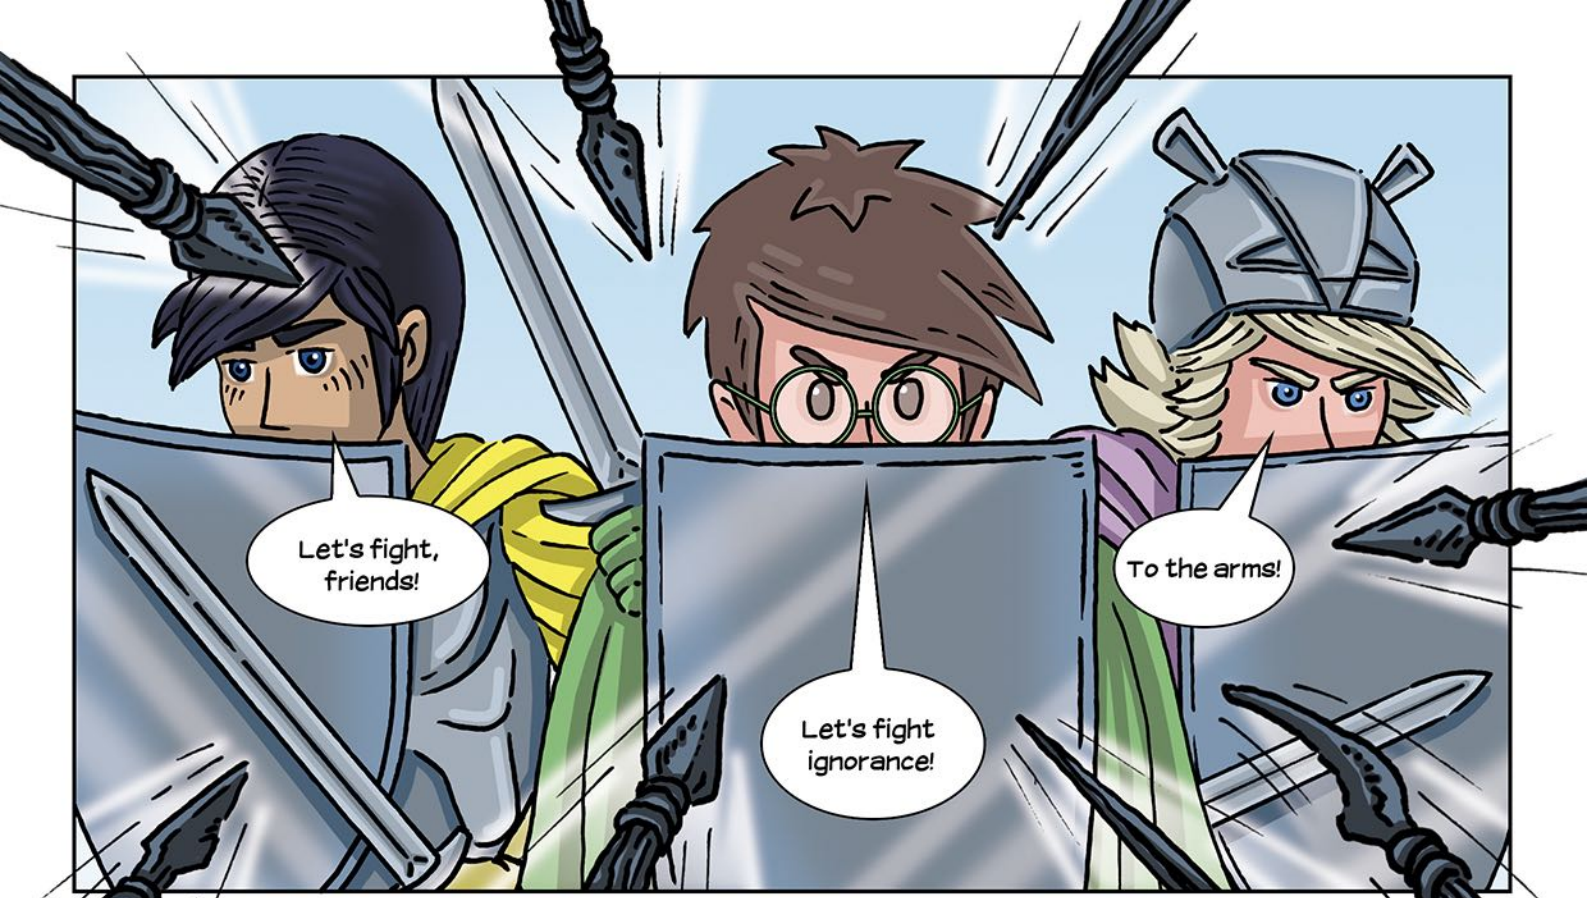

I will not stand
in your way!

But I will!

Army,
forward!

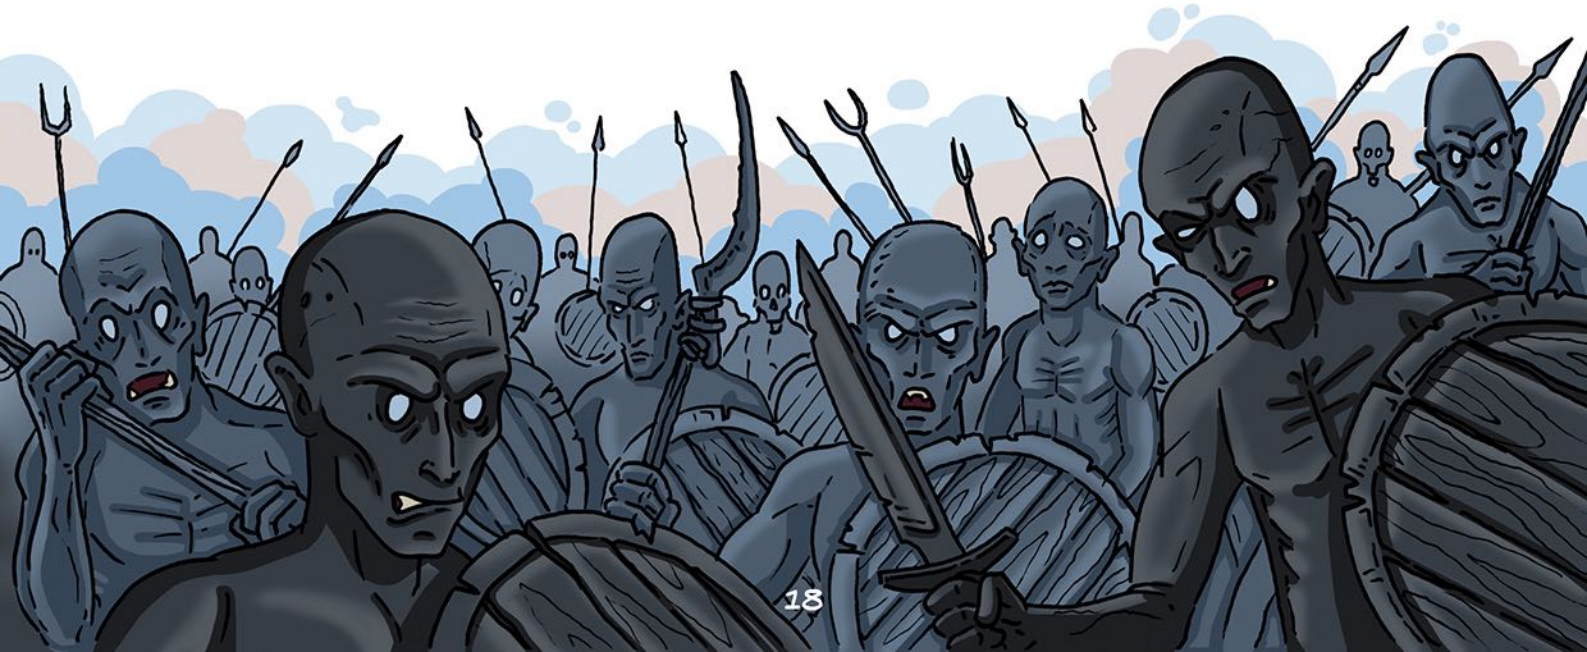

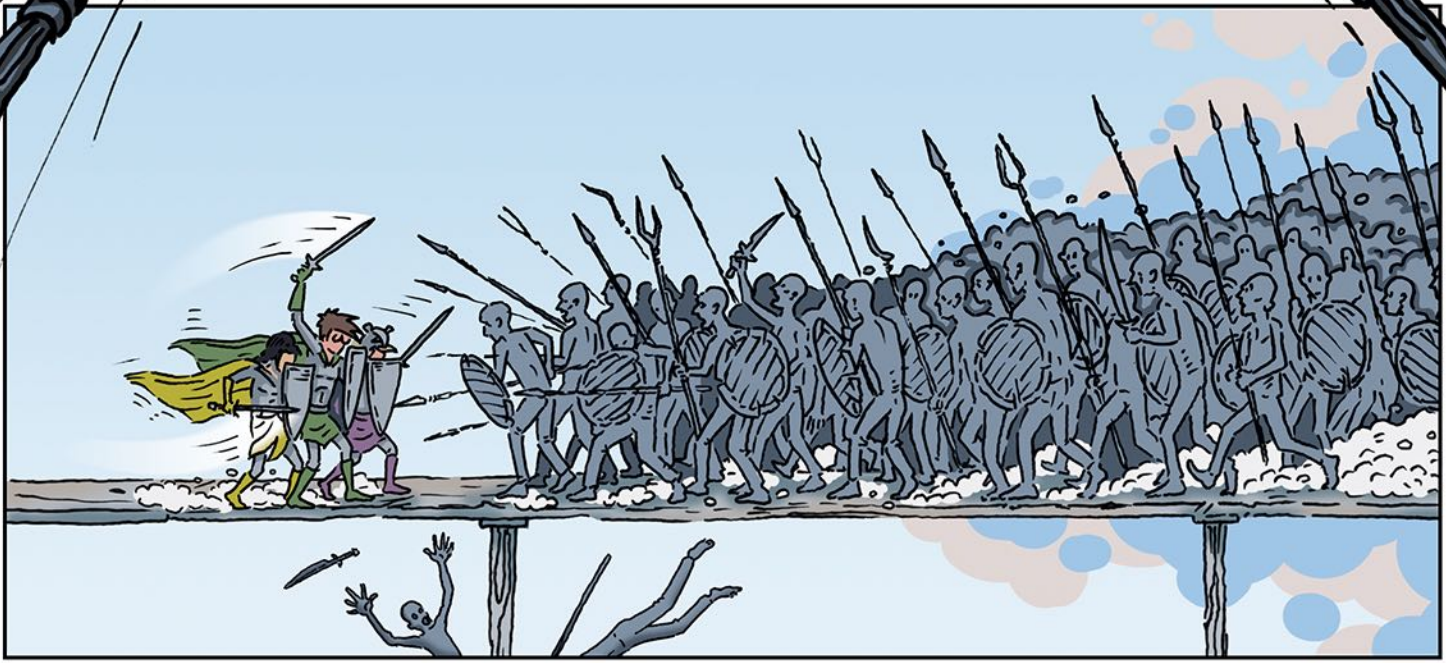

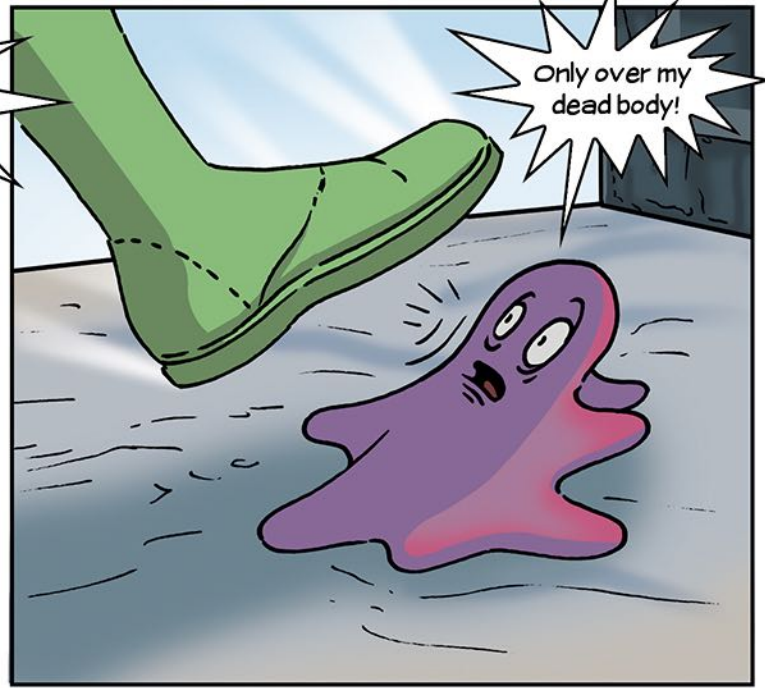

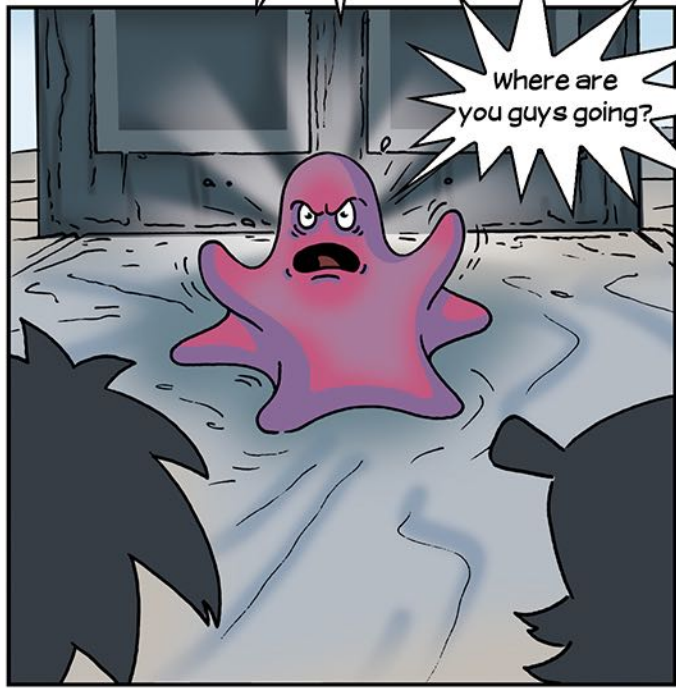

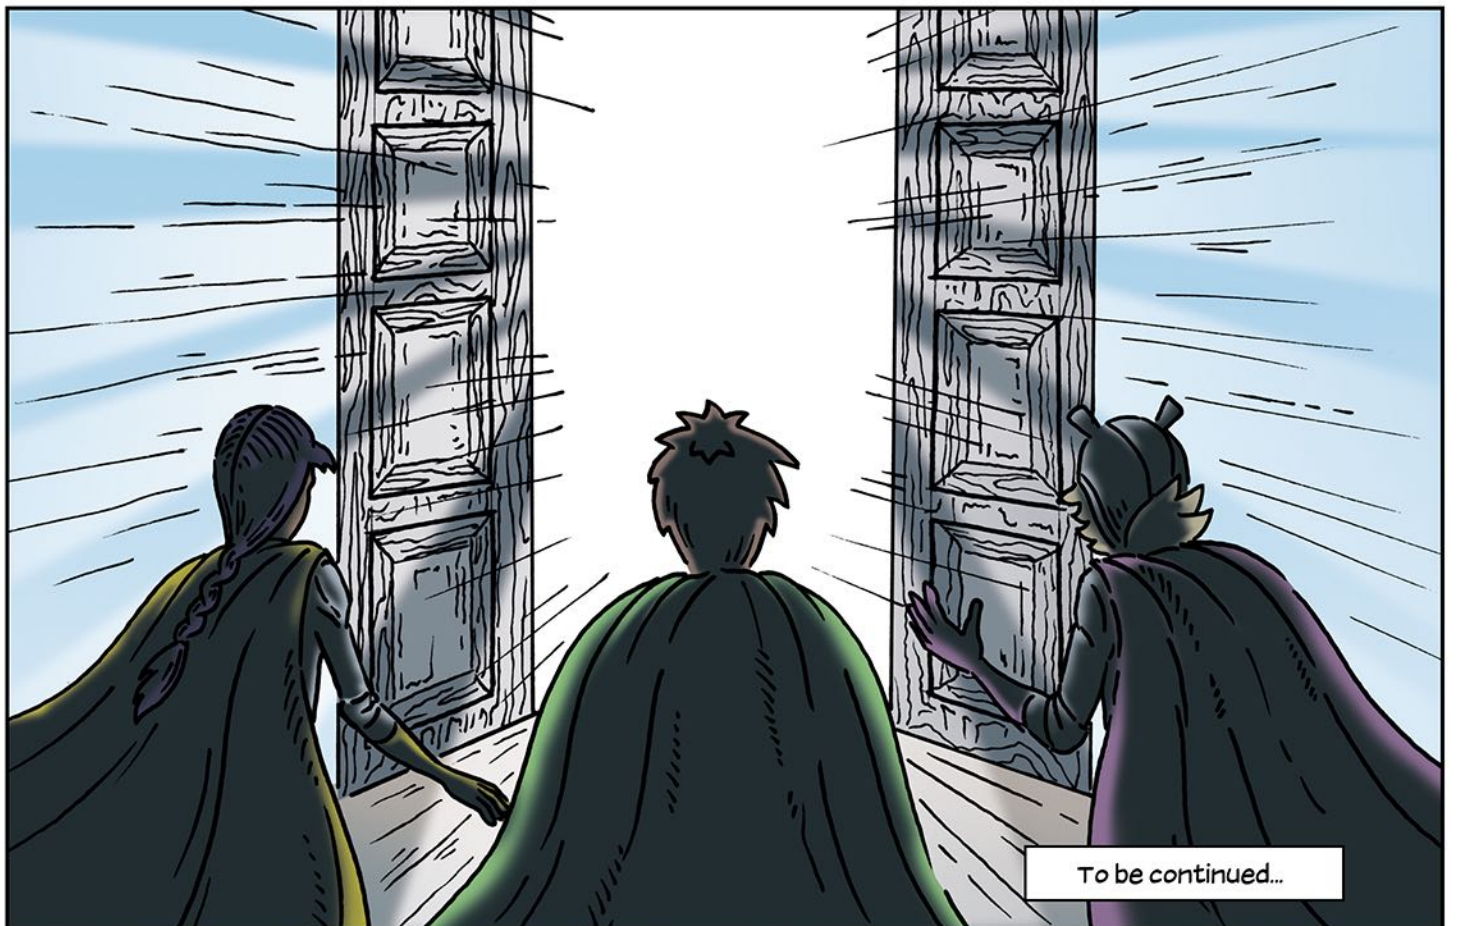

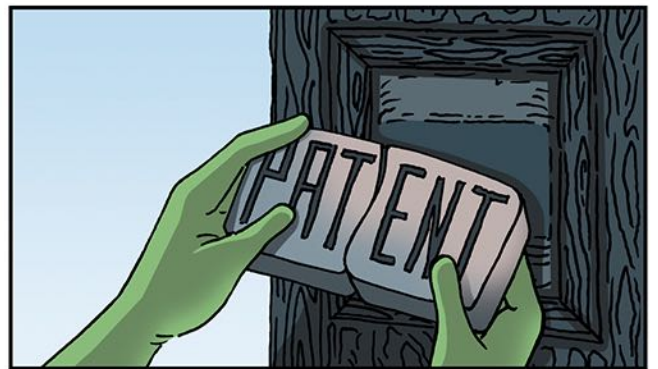

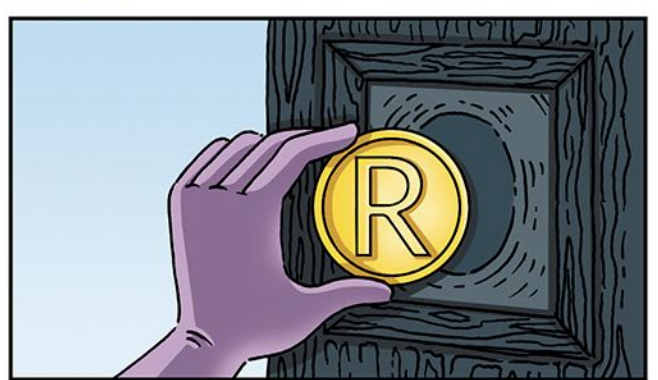

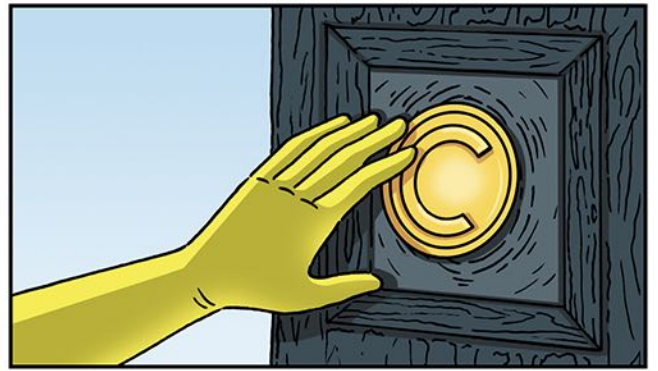

Let's fight, friends!

Let's fight ignorance!

To the arms!
