INTELLECTUAL PROPERTY IN FIGURES

Activity indicators in the field of intellectual property
for 9 months of 2024

Kyiv – 2024

The statistical and analytical booklet «Intellectual Property in Figures» of the UANIPIO (IP Office) reflects information on the main indicators of activity in the field of intellectual property for 9 months of 2024, in particular: statistics on the filing and registration for industrial property rights protection (inventions, utility models, industrial designs, trademarks) and copyright objects, as well as analysis of the inventive activity of resident applicants and business activity in Ukraine.

The booklet can be used by a wide range of stakeholders who are interested not only in numbers themselves, but also in how they reflect changes in real time and thus provide important information for analysis, comparison, and decision-making.

I. Main Performance Indicators

1. Common Tendencies

Ukraine's economy continues to adapt to the challenges of wartime. One of these challenges, which has a significant impact on the field of intellectual property, is the shortage of qualified workers caused by migration and mobilization processes. According to the UN Refugee Agency, as of September 16, 2024, 6.79 million Ukrainian citizens were recorded worldwide who were forced to flee their country escaping from war.

In the Global Innovation Index 2024 (GII-2024) published by the World Intellectual Property Organization (WIPO), Ukraine ranked 60th, down 5 positions from last year, but continues to lead in terms of the number of filed utility model applications. According to WIPO, one of the main weaknesses of the Ukrainian economy is human capital. However, despite the deterioration of Ukraine's GII-2024 ranking as a result of the Russian invasion, which caused the destruction of infrastructure, population outflow and a tragic humanitarian crisis, global recovery is becoming an important element of the national economy's sustainability and innovative reconstruction of the war-torn country.

A total of 23,604 applications for industrial property rights protection were filed in 9 months of 2024 (Table 1, Figure 1), including:

- 1,920 patents filed (↘ 7.7%);
- 2,741 applications for utility models (↗ 9.3%);
- 820 applications for industrial designs (↘ 2.8%);
- 18,123 trademark applications (↘ 0.1%).

Table 1. Applications for Industrial Property Rights Protection in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	28,094	30,557	16,356	23,575	23,604	100.1%
Inventions, including PCT applications	2,276	2,428	1,934	2,080	1,920	92.3%

¹ Data for previous years have been updated

² Previous data

Figure 1. Dynamics of Applications for Industrial Property Rights Protection in 9 Months of the Year from 2020 to 2024

Following the results of 9 months of 2024, the registration rates for industrial property rights protection (Table 2, Figure 2) continue to grow. A total number of 15,222 industrial property objects rights were registered (\nearrow 10.4%), including:

- 903 inventions (\searrow 1.2%);
- 2,408 utility models (\nearrow 30.6%);
- 731 industrial designs (\nearrow 62.4%);
- 11,180 trademark applications (\nearrow 5.7%).

Table 2. Industrial Property Rights Registrations in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024	2024 to 2023
Total	22,386	23,380	18,304	13,790	15,222	110.4%
Inventions, including PCT applications	1,614	1,756	1,373	914	903	98.8%
Utility models, including PCT applications	5,092	3,193	1,810	1,844	2,408	130.6%
Industrial designs (under the national procedure)	1,579	1,451	600	450	731	162.4%
Trademarks (under the national procedure)	14,101	16,980	14,521	10,582	11,180	105.7%

Figure 2. Dynamics of Industrial Property Rights Registrations in 9 Months of the Year from 2020 to 2024

Evaluating the indicators of filed applications and registrations for industrial property rights protection, it can be stated that the trends in the field of industrial property are generally positive.

2. Inventions

The number of applications for inventions filed in the first 9 months of 2024 remains at the same level as the previous war years.

A total of 1,920 applications for inventions were filed (\searrow 7.7%), including: 831 (\searrow 2.5%) – under the national procedure, and 1,089 (\searrow 11.3%) – under the PCT procedure. Comparing the indicators of applications filed by resident and non-resident applicants for 9 months of 2020-2024, it can be noted that the share of applications filed by non-resident applicants in the current period continues to prevail and amounts to 64.4% (Table 3, Figure 3).

Table 3. Patents Filed in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	2,276	2,428	1,934	2,080	1,920	92.3%
Under the national procedure	1,141	1,114	674	852	831	97.5%
by resident applicants	940	903	502	719	682	94.9%
by non-resident applicants	201	211	172	133	149	112.0%
Under the PCT procedure	1,135	1,314	1,260	1,228	1,089	88.7%
including by resident applicants	1	5	2	4	2	50.0%

Figure 3. Dynamics of Patents Filed in 9 Months of the Year from 2020 to 2024

Applications filed under the PCT procedure (87.9%) significantly prevail among applications from non-resident applicants (Figure 4).

Figure 4. Correlation between Applications Filed by Resident and Non-Resident Applicants for 9 Months of 2024

In the first 9 months of 2024, the total number of applications for inventions from non-resident applicants decreased by 8.9% compared to the same period in 2023. The United States, the United Kingdom, Germany and Switzerland continue to be the leaders in filing applications. At the same time, the number of applications filed from such countries as Belgium (↗ 68.2%) and China (↗ 33.3%) increased significantly (Table 4, Figure 5).

Table 4. Non-Resident Applications by Origin in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	1,335	1,520	1,430	1,357	1,236	91.1%
United States of America	363	429	409	357	341	95.5%
United Kingdom	78	117	137	155	144	92.9%
Germany	171	155	147	141	116	82.3%
Switzerland	144	153	165	175	97	55.4%
Luxembourg	54	40	50	51	61	119.6%
China	69	99	65	36	48	133.3%
France	36	52	47	46	47	102.2%
Japan	41	51	51	38	37	97.4%
Belgium	21	35	40	22	37	168.2%

Netherlands (Kingdom of the)	31	38	27	35	29	82.9%
Sweden	13	24	22	34	29	85.3%
Republic of Korea	24	39	27	48	28	58.3%
Denmark	31	20	36	11	16	145.5%
Other	218	241	184	182	172	94.5%

Figure 5. Non-Resident Applications for Inventions by Origin for 9 Months of 2024

Summarizing the indicators for the first 9 months of 2024, the number of registered inventions in the name of non-resident applicants increased (\nearrow 7.8%), while in the name of resident applicants slightly decreased (\searrow 16.7%). Similarly to the filing indicators, the share of patents registered in the name of non-resident applicants has prevailed for the past 5 years (Table 5, Figure 6).

Table 5. Patents Granted in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024	2024 to 2023
Total	1,614	1,756	1,373	914	903	98.8%
to residents	793	753	550	336	280	83.3%
to non-residents	821	1,003	823	578	623	107.8%

Figure 6. Dynamics of Patents Granted in 9 Months of the Year from 2020 to 2024

3. Utility Models

Following the results of 9 months of 2024, the indicator of filed applications for utility model shows a growth (\nearrow 9.3%) due to an increase in the number of applications from resident applicants – 2,689 (\nearrow 10.0%). However, utility models are not popular among non-resident applicants: a total of 52 applications were filed (Table 6, Figure 7).

Table 6. Applications for Utility Models in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	4,025	3,095	1,706	2,507	2,741	109.3%
Under the national procedure	4,018	3,091	1,702	2,503	2,740	109.5%
by residents	3,825	3,026	1,664	2,444	2,689	110.0%
by non-residents	193	65	38	59	51	86.4%
Under the PCT procedure	7	4	4	4	1	25.0%
including by residents	–	–	–	2	–	–

Figure 7. Dynamics of Applications for Utility Models Filed in 9 Months of the Year from 2020 to 2024

In the first 9 months of 2024, the number of utility model registrations increased significantly, both in the name of resident applicants – 2,351 patents (\nearrow 29.2%) and non-resident applicants – 57 patents (\nearrow 128.0%) (Table 7, Figure 8).

Table 7. Utility Models Registrations in the 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024	2024 to 2023
Total	5,092	3,193	1,810	1,844	2,408	130.6%
to residents	4,996	3,070	1,774	1,819	2,351	129.2%
to non-residents	96	123	36	25	57	228.0%

Figure 8. Dynamics of Utility Models Registrations in 9 Months of the Year from 2020 to 2024

4. Industrial Designs

After the recession in 2022, the number of industrial design applications filed by resident applicants gradually increased and reached 751 applications (\nearrow 1.1%). The share of applications from non-resident applicants, as in previous years, is insignificant – 8.4% (69 applications) (Table 8, Figure 9).

Table 8. Applications for Industrial Designs (under the National Procedure) Filed in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	1,503	1,481	653	844	820	97.2%
by residents	1,316	1,356	581	743	751	101.1%
by non-residents	187	125	72	101	69	68.3%

Figure 9. Dynamics of Industrial Designs Applications (under the National Procedure) Filed in 9 Months of the Year from 2020 to 2024 *

Following the results of 9 months of 2024, the number of industrial design registrations exceeds the indicators of 2022 and 2023 (Table 9, Figure 10). The number of industrial design registrations increased significantly both in the name of non-resident applicants – 119 (\nearrow 124.5%) and in the name of resident applicants – 612 (\nearrow 54.2%). The share of registrations in the name of non-resident applicants increased and amounted to 16.3%, which is the highest indicator for the last 5 years.

* Industrial design applications by regions of Ukraine are implemented in a form of Interactive Regional Maps, that are available on <https://nipo.gov.ua/en/statistics-reports/>

Table 9. Industrial Design Registrations (under the National Procedure) in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024	2024 to 2023
Total	1,579	1,451	600	450	731	162.4%
to residents	1,419	1,264	545	397	612	154.2%
to non-residents	160	187	55	53	119	224.5%

■ By Residents ■ By Non-residents

Figure 10. Dynamics of Industrial Design Registrations (under the National Procedure) in the 9 Months of the Year from 2020 to 2024

During the first 9 months of 2024, under the Hague Agreement Concerning the International Registration of Industrial Designs, the International Bureau of WIPO published information on 341 international registrations designating Ukraine for legal protection. The largest number of them are from the following countries: 96 (28.2% of the total) – from Switzerland, 29 (8.5%) – France, 24 (7.0%) – Italy, 21 (6.1%) – Germany, 20 (5.9%) – the USA, 17 (5.0%) – China and Czechia, 16 (4.7%) – Ukraine, 11 (3.2%) – Netherlands (Kingdom of the) and Spain (Figure 11).

Figure 11. Registrations under the Hague Agreement by Origin for 9 Months of 2024

Most of the international registrations belong to classes: 10 (Clocks and watches and other measuring instruments, checking and signalling instruments) – 57 registrations, 9 (Packaging and containers for the transport or handling of goods) – 35 registrations, 7 (Household goods, not elsewhere specified) – 34 registrations, 12 (Means of transport or hoisting) – 31 registrations, 2 (Articles of clothing and haberdashery) and 11 (Articles of adornment) – 20 registrations each, 23 (Fluid distribution equipment, sanitary, heating, ventilation and air-conditioning equipment, solid fuel) – 19 registrations, 21 (Games, toys, tents and sports goods) – 14 registrations.

5. Trademarks

Comparing the indicators of trademark applications filed in the first 9 months of 2023 and 2024, it can be stated that their number has not changed significantly (Table 10, Figure 12) and amounts to 21,979 applications (\downarrow 1.7%), including 18,123 applications under the national procedure, which is only 0.1% less than in the last year's indicator of the correspondent period.

The number of applications filed under the national procedure by non-resident applicants has increased – 2,150 applications (\uparrow 9.5%), and by residents slightly decreased – 15,973 applications (\downarrow 1.3%).

There has been a gradual decrease in the number of applications received under the Madrid system for the past 3 years. Thus, in the first 9 months of 2024, there were 3,856 received applications (\downarrow 8.6%).

Table 10. Trademark Applications Filed in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	25,998	29,329	17,389	22,361	21,979	98.3%
Under the national procedure	20,290	23,553	12,061	18,144	18,123	99.9%
by residents	17,382	20,409	10,334	16,180	15,973	98.7%
by non-residents	2,908	3,144	1,727	1,964	2,150	109.5%
Under the Madrid System	5,708	5,776	5,328	4,217	3,856	91.4%

Figure 12. Dynamics of Trademark Applications (under the National Procedure) in 9 Months of the Year from 2020 to 2024

Among non-resident applicants, the United States, Switzerland and Cyprus continue to be the leaders in filing trademark applications. In the reporting period, the number of applications filed by applicants from the United States, Mauritius, India and Spain increased significantly compared to previous years (Figure 13, Annex 11).

Figure 13. Trademark Applications (under the National Procedure) by Non-residents by Origin for 9 Months of 2024

During the first 9 months of 2024, the largest number of applications for international trademark registration under the Madrid system came from: China (650 applications), Germany (438 applications), the United States and France (278 applications each), Italy (239 applications), Switzerland (229 applications), Hungary (176 applications), Türkiye (154 applications), Bulgaria (119 applications), the United Kingdom (112 applications), the Republic of Korea (89 applications) and Poland (87 applications) (Figure 14).

Figure 14. Trademark Applications (under the Madrid System) by Origin for 9 Months of 2024

Among the total number of trademark applications, the share of applications from resident applicants (72.7%) continues to prevail the share of applications from non-resident applicants, which is 27.3%. During 9 months of 2024, non-resident applicants filed 35.8% of applications under the national procedure and 64.2% under the Madrid system (Figure 15).

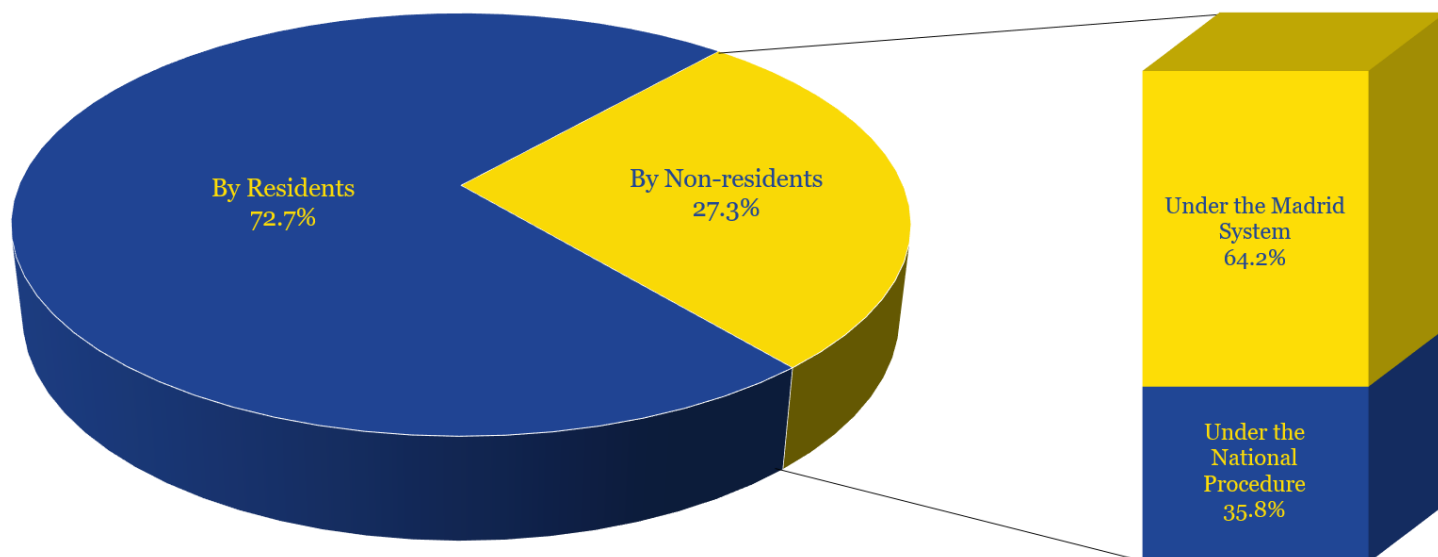

Figure 15. Trademark Applications Correlation between by Resident and Non-Resident Applicants for 9 Months of 2024

The number of registered trademarks under the national procedure for 9 months of 2024 amounted to 11,180, which is 5.7% more than last year's indicators of the correspondent period. The number of registered trademarks increased both in the name of resident applicants (\nearrow 4.9%) and in the name of non-resident applicants (\nearrow 9.7%) (Table 11, Figure 16).

Table 11. Trademark Registrations (under the National Procedure) in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024	2024 to 2023
Total	14,101	16,980	14,521	10,582	11,180	105.7%
to residents	12,066	14,774	11,819	8,860	9,291	104.9%
to non-residents	2,035	2,206	2,702	1,722	1,889	109.7%

Figure 16. Dynamics of Trademark Registrations (under the National Procedure) in 9 Months of the Year from 2020 to 2024

6. Copyright

Summarizing the results of the first 9 months of 2024, it can be stated that the number of filed contracts relating to the author's right in a work slightly decreased – 289 (\searrow 5.9%), but the number of applications for registration of copyright in a work increased and amounted to 7,935 (\nearrow 14.5%) (Table 12, Figure 17).

Table 12. Applications for Registration of Copyright and Contracts Relating to the Author's Right in a Work in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024 ²	2024 to 2023
Copyright in a Work	4,800	6,951	4,565	6,933	7,935	114.5%
Contracts Relating to the Author's Right in a Work	297	367	171	307	289	94.1%

Figure 17 Dynamics of Applications for Registration of Copyright and Contracts Relating to the Author's Right in a Work in 9 Months of the Year from 2020 to 2024

In the reporting period, compared to the indicators for 9 months of 2023, there was an increase in the number of registrations of copyright – 7,680 (\uparrow 33.1%), and registrations of contracts relating to the author's right to a work – 299 (\uparrow 20.6%) (Table 13, Figure 18).

In general, there are positive trends in the field of copyright, which may indicate not only an increase in creative activity, but also the development of digital platforms and services, where it is also important to protect authors' rights from unlawful use.

Table 13. Registrations of Copyright and Contracts Relating to the Author's Right in a Work in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024 ²	2024 to 2023
Copyright in a Work	4,897	6,793	4,313	5,770	7,680	133.1%
Contracts Relating to the Author's Right in a Work	300	337	136	248	299	120.6%

Figure 18. Dynamics of Registrations of Copyright and Contracts Relating to the Author's Right in a Work in 9 Months of the Year from 2020 to 2024

During 9 months of 2024, among the registered subject matters of copyright literary works has the largest number of copyright registrations – their share is 68.6% of the total number. Literary works are followed by: computer programs – 8.0%, works of fine arts – 6.2%, illustrations – 4.8%, musical works – 4.4%, composite works – 3.9%, and oral works – 0.7% (Figure 19).

Figure 19. State Registrations of Copyright in a Work by Subject Matter for 9 Months of 2024

II. Analysis of Inventive Activity of Resident Applicants

1. Applications for Inventions and Utility Models

Innovation is the main driver of economic growth. Country's innovation potential, competitiveness and economic growth depend on the inventive activity of resident applicants. The best way to ensure economic progress is to provide innovators with resources and opportunities.

During the difficult times of Russian aggression, Ukrainian inventors face another challenge: obtaining legal protection for innovative solutions that help on the battlefield. This can be an important factor in economic development in the long run, as new military technologies are of interest to all developed countries. Despite the staff shortage and wartime challenges, in the field of intellectual property, the indicators of inventive activity of national applicants increased in the first 9 months of 2024 (Table 14, Figure 20) – the total number of applications for inventions and utility models increased by 6.4%. In total, 3,373 applications for inventions and utility models were filed, of which a significant part – 1,794 applications for utility models – were filed by legal entities.

Table 14. Inventions and Utility Models Applications by Residents in 9 Months of the Year from 2020 to 2024¹

	2020	2021	2022	2023	2024 ²	2024 to 2023
Total	4,766	3,934	2,168	3,169	3,373	106.4%
Inventions, including	941	908	504	723	684	94.6%
by legal entities	511	492	299	392	364	92.9%
by individuals	430	416	205	331	320	96.7%
Utility models, including	3,825	3,026	1,664	2,446	2,689	109.9%
by legal entities	2,394	1,910	1,035	1,525	1,794	117.6%
by individuals	1,431	1,116	629	921	895	97.2%

Figure 20. Dynamics of Inventions and Utility Models Applications by Residents in 9 Months of the Year from 2020 to 2024

In comparison to the same period in 2023, educational institutions prevail among national legal entities in terms of the number of filed applications – 1,580 applications (\uparrow 15.3%), representing 73.2% of the total. The number of applications filed by research institutions remains almost at the same level – 316 applications (\downarrow 1.3%), and their share in the reporting year is 14.6%. The share of applications from other organizations and enterprises is 12.2% (Figure 21, Annex 3).

Figure 21. Dynamics of Inventions and Utility Models Applications by Resident Legal Entities in 9 Months of the Year from 2020 to 2024

Following the results of 9 months of 2024, among the government authorities the most active in filing applications for inventions and utility models were organizations subordinated to the Ministry of Education and Science of Ukraine – 1,294 applications (\uparrow 20.8%), the National Academy of Sciences of Ukraine – 228 applications (\uparrow 10.7%), the Ministry of Health of Ukraine – 137 applications (\uparrow 1.4%), the Ministry of Defense of Ukraine – 77 applications (\uparrow 1.3%) (Annex 4).

The most active higher education institutions under the Ministry of Education and Science of Ukraine were (Figure 22):

Figure 22. Higher Educational Institutions under the Ministry of Education and Science of Ukraine with the Highest Inventive Activity for 9 Months of 2024

Among institutions of the National Academy of Sciences (NAS) of Ukraine, the highest inventive activity in the reporting period was observed in (Figure 23):

Figure 23. Institutions of NAS of Ukraine with the Highest Inventive Activity for 9 Months of 2024

Higher educational institutions and scientific organizations with the highest inventive activity are presented in annexes 5, 6.

In the regional distribution* (Figure 24, Annexes 7 and 8), the largest number of applications for inventions and utility models was filed by applicants from Kyiv City – 855 applications (25.3% of the total number of applications filed by resident applicants).

Other regions were distributed as following:

- Kharkiv – 549 applications (16.3%);
- Dnipropetrovsk – 314 applications (9.3%);
- Lviv – 204 applications (6.0%);
- Vinnytsia – 158 applications (4.7%);
- Odesa – 151 applications (4.5%);
- Kyiv – 129 applications (3.8%);
- Poltava – 121 applications (3.6%);
- Ternopil – 104 applications (3.1%);
- Donetsk – 93 applications (2.8%).

Figure 24. Applications for Inventions and Utility Models by Regions of Ukraine for 9 Months of 2024

* Applications for inventions and utility models by regions of Ukraine are implemented in a form of Interactive Regional Maps, that are available on <https://nipo.gov.ua/en/statistics-reports/>

2. Registration of Inventions and Utility Models

Following the results of 9 months of 2024, the total number of registered inventions and utility models increased to 2,631 (↑ 22.1%), mainly due to an increase in registered utility models – 2,351 (↑ 29.2%), of which 1,551 (↑ 19.6%) were registered in the name of legal entities and 800 (↑ 53.3%) in the name of individuals (Table 15, Figure 25).

Table 15. Inventions and Utility Models Grants to Residents in 9 Months of the Year from 2020 to 2024

	2020	2021	2022	2023	2024	2024 to 2023
Total	5,789	3,823	2,324	2,155	2,631	122.1%
Inventions, including to legal entities	793	753	550	336	280	83.3%
to individuals	529	506	335	231	226	97.8%
Utility models, including to legal entities	264	247	215	105	54	51.4%
to individuals	4,996	3,070	1,774	1,819	2,351	129.2%
	3,237	1,950	1,072	1,297	1,551	119.6%
	1,759	1,120	702	522	800	153.3%

Figure 25. Dynamics of Inventions and Utility Models Grants to Residents in 9 Months of the Year from 2020 to 2024

The distribution of inventions and utility models registrations by regions* of Ukraine in 2020-2024 (9 months) is shown in Annex 9. Annex 10 shows the distribution of registrations for inventions and utility models by resident legal entities by economic activities in 2020-2024 (9 months).

III. Business Activity Analysis

1. Resident and Non-Resident Applicants with the Highest Number of Filed Applications for Trademarks

"A brand for a company is like a reputation for a person. You earn reputation by trying to do hard things well" – said Jeff Bezos, founder of the tech giant Amazon. Trademark protection is essential for businesses of all sizes, playing a crucial role in establishing and maintaining brand identity and market presence. In addition, successful brands not only foster loyalty and trust among consumers, but also have the ability to attract and retain employees. A trademark is also a key element in promoting brands globally.

Among the national enterprises with the largest number of filed trademark applications (Figure 26) in the reporting period are the following:

- Limited Liability Company PHARMIC LTD (Kharkiv);
- Limited Liability Company GGBET (Kyiv);
- Private Joint Stock Company OBOLON (Kyiv);
- Limited Liability Company REAL BARGAIN (Poltava);
- Limited Liability Company BETTING COMPANY FAVBET (Kyiv);
- Joint Stock Company FARMAK (Kyiv);
- Limited Liability Company ALARTE (Dnipropetrovsk);
- Private Joint Stock Company CARLSBERG UKRAINE (Zaporizhzhia);
- Limited Liability Company KIDDISVIT (Dnipropetrovsk);
- Limited Liability Company DELTA MEDICAL (Kyiv region);
- Limited Liability Company Aqua-Polyana (Zakarpattia);
- Limited Liability Company VORWARTS PHARMA (Kyiv).

Figure 26. National Enterprises with the Highest Number of Trademark Applications (under the National Procedure) for 9 Months of 2024

The foreign companies with the highest number of trademark applications for 9 months of 2024 (Figure 27):

- Rothmans of Pall Mall Limited (Switzerland);
- GSH Trademarks Limited (Cyprus);
- Danjaq, LLC (USA);
- British American Tobacco (Brands) Limited (United Kingdom);
- British American Tobacco (Brands) Inc. (USA);
- Nemiroff Intellectual Property Establishment (Liechtenstein);
- PepsiCo, Inc. (USA);
- Puig France (France);
- Adidas AG (Germany);
- Evyap (Türkiye);
- Winso Int. Sp. z o.o. (Poland).

Figure 27. Foreign Companies with the Highest Number of Trademark Applications (under the National Procedure) for 9 Months of 2024

In the corresponding period the largest number of applications under the Madrid system was filed by the following foreign companies (Figure 28):

- Richter Gedeon Nyrt. (Hungary);
- Euro Games Technology Ltd. (Bulgaria);
- L'Oréal (France);
- Egis Gyogyszergyar Zrt. (Hungary);
- Boehringer Ingelheim International GmbH (Germany);
- Albaugh tovarna kemicnih izdelkov d.o.o. (Slovenia);
- Philip Morris Products S.A. (USA);
- Novartis AG (Switzerland);
- Apple Inc. (USA);
- Royal Armenia JV LTD (Armenia);
- Louis Vuitton Malletier (France).

Figure 28. Foreign Companies with the Highest Number of Trademark Applications (under the Madrid System) for 9 Months of 2024

2. Business Activity Priorities based on the Nice Classification

The largest number of trademarks applications under the national procedure in the first 9 months of 2024 was filed under the Class 35 of the Nice Classification (6,754 applications), which primarily includes services related to business management, operation, organization, and administration of trade or industrial enterprises, as well as advertising, marketing, and sales promotion services (Table 16, Figure 29).

Table 16. List of NCL Classes under the National Procedure with the Highest Number of Filed Trademark Applications for 9 Months of 2024²

NCL Class	Class Heading	qty	By Residents	By Non-residents
35	Advertising; business management, organization and administration; office functions.	6,754	6,403	351
41	Education; providing of training; entertainment; sporting and cultural activities.	2,515	2,359	156
5	Pharmaceuticals, medical and veterinary preparations; sanitary preparations for medical purposes; dietetic food and substances adapted for medical or veterinary use, food for babies; dietary supplements for human beings and animals; plasters, materials for dressings; material for stopping teeth, dental wax; disinfectants; preparations for destroying vermin; fungicides, herbicides.	2,011	1,415	596
43	Services for providing food and drink; temporary accommodation.	1,394	1,353	41
30	Coffee, tea, cocoa and substitutes therefor; rice, pasta and noodles; tapioca and sago; flour and preparations made from cereals...	1,370	1,281	89
25	Clothing, footwear, headwear.	1,244	1,137	107

Table 16 (continued)

NCL Class	Class Heading	qty	By Residents	By Non-residents
9	Scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signalling, detecting, testing, inspecting, life-saving and teaching apparatus and instruments...	1,223	984	239
44	Medical services; veterinary services; hygienic and beauty care for human beings or animals; agriculture, aquaculture, horticulture and forestry services.	1,206	1,160	46
42	Scientific and technological services and research and design relating thereto...	1,139	975	164
3	Non-medicated cosmetics and toiletry preparations; non-medicated dentifrices; perfumery, essential oils; bleaching preparations and other substances for laundry use; cleaning, polishing and abrasive preparations.	1,123	884	239

Figure 29. Distribution Priorities of Applications for Trademarks (under the National Procedure) by NCL Classes for 9 Months of 2024

The vast majority of trademark applications under the Class 35 were filed by resident applicants – 6,403 applications (Figure 30).

Figure 30. Distribution Priorities of Applications for Trademarks by Residents (under the National Procedure) by NCL Classes for 9 Months of 2024

During the first 9 months of 2024, non-resident applicants filed the largest number of trademark applications under the national procedure (Figure 31) under the Class 5 of the Nice Classification (596 applications), which includes Pharmaceuticals, medical and veterinary preparations; sanitary preparations for medical purposes; dietetic food and substances adapted for medical or veterinary use.

Figure 31. Distribution Priorities of Applications for Trademarks by Non-Residents (under the National Procedure) by NCL Classes for 9 Months of 2024

ANNEXES
